## Keeping Our Kids Safe

Teaching our students to be cybersafe will help them to engage with the online world safely, responsibly and in a positive manner.

A whole-of-community approach to Cybersafety will protect our students from online risks and give them the knowledge and skills of how to respond to challenging situations.

These resources offer families support and information around netiquette, cyberbullying, protecting personal information, accessing or sharing inappropriate content and promoting positive social online behaviours amongst children.
