

What do I need to do to be ready for BYOD?

1. Purchase an iPad from the store of your choice, making sure it meets minimum requirements (32 gigabyte is the minimum requirement, however if you have any plans to use the iPad for anything besides school apps, our strong recommendation is to buy at least 64 gigabytes) OR utilise an existing iPad (make sure it is insured and has a sturdy cover.)
2. Pay your once-only "iPad Resources Charge" on the booklist. Please note that this charge must be paid before our educational apps will be issued – incoming Year 3 and new students only.
4. Put any restrictions on the iPad that you may wish (refer to documentation on Black Hill Primary School website to help you.)
5. Read, understand and sign the Digital Technologies agreement and BYOD agreements that will issued at your child's 1:1 Assessment Interview with their teacher at the start of 2018. Return each agreement to school ASAP.
7. Bring the iPad to school, where the device will be added to our server, and apps will be installed automatically.
